Training & Solutions

ADVANCE JAVA COURSE

Course Curriculum

Module 1: Wrapper Class

- Understanding wrapper classes for primitive data types
- Auto boxing and unboxing

Module 2: Encapsulation

- Encapsulation principles and benefits
- Implementing encapsulation in Java classes

Module 3: Singleton Class

- Designing and implementing singleton classes
- Singleton patterns and best practices

Module 4: SQL

- Introduction to SQL (Structured Query Language)
- Connecting Java applications to databases
- Executing SQL queries using JDBC

Module 5: Multithreading

- Basics of multithreading in Java
- Synchronization and thread safety
- Thread pools and concurrency utilities

Module 6: XML, JSON, CSV

- Parsing and generating XML using DOM and SAX parsers
- Working with JSON data in Java
- Reading and writing CSV files

Module 7: JDBC Connection

- Establishing database connections using JDBC
- CRUD operations (Create, Read, Update, Delete) using JDBC

Module 8: Serialization

- Serializing and de-serializing objects in Java
- Implementing Serializable and Externalizable interfaces

Module 9: Java Regex

- Understanding regular expressions in Java
- Pattern matching and text manipulation using regex

Module 10: Date and Time

- Handling date and time in Java
- Working with Local Date, Local Date Time, and other date/time classes

Module 11: Coding Standards

- Introduction to coding standards and best practices
- Naming conventions, code formatting, and documentation

Module 12: Factory Design Pattern

- Understanding the Factory design pattern
- Implementing factory methods and factory classes

Module 13: Generics

- Introduction to generics in Java
- Writing generic classes, methods, and interfaces

Module 14: Debugging

- Techniques for debugging Java applications
- Using debugging tools and IDE features effectively

Module 15: J2EE (Java 2 Platform, Enterprise Edition) Overview

- Introduction to J2EE architecture and components
- Understanding servlets, JSP (Java Server Pages), and EJB (Enterprise JavaBeans)

Prerequisites:
Basic knowledge of Java programming language.
Familiarity with object-oriented programming concepts.

Duration:
This course is structured to be completed in approximately 08 -12 weeks.
